Free Product(s): Anti-Virus, Firewall, Internet security

Zone Alarm Free Firewall (free download)

Anti-virus, firewall, anti-spyware

COMPUTER MONITORING SOFTWARE OR WEBSITES (Search “computer monitoring software” on the Internet)

Act Mon: <http://www.actmon.com/>

No support offered. Relatively inexpensive.

“The Home Edition records EVERYTHING (including Web sites, Chat, Email and AOL). It is the best choice for parents who wish to monitor what their children are doing online. It is an excellent alternative to standard filtering and blocking software. To avoid tampering of the software, it features a unique file protection that makes the ActMon files truly invisible to every user and every windows software. The software can be installed in less than five minutes and runs 100% maintenance free.”

This is an example of the type of software used for monitoring. This is taken directly from the ActMon website. THIS IS NOT AN ENDORSEMENT OF THE SOFTWARE. COMPARISON SHOPPING IS ENCOURAGED AS OTHER SOFTWARE IS ALSO IN THE ACTMON PRICE RANGE.
